Galapagos Islands

TOM JACKSON

Nestling more than 1000km (600 miles) from the South American coast among the azure waters of the Pacific Ocean, the Galapagos are famous as the source of Charles Darwin's theory of evolution in 1835. Today, these 19 islands and the surrounding marine reserve have been called a 'living museum and showcase of evolution'. This is due to some rare and unusual animals; the land iguana, blue-footed booby and the many types of finch, which are featured – along with the penguins, sea lions and Galapagos hawks – in vivid detail in this book.

TOM HORNE

Treasures of the Vikings explores the material culture of this raiding people, who plundered artefacts, treasure and weaponry from across the trade routes of Europe and Asia. From 793, when Norse raiders attacked the monastery at Lindesfarne on the coast of England, to the demise of Norwegian control of the Scottish Hebrides in 1266, the Vikings played a central role in European history, as pirates, traders and mercenaries, leaving a trail of settlement, treasure and destruction from Newfoundland to the shores of the Black Sea.

The Book of Tea

OKAKURA KAKUZŌ

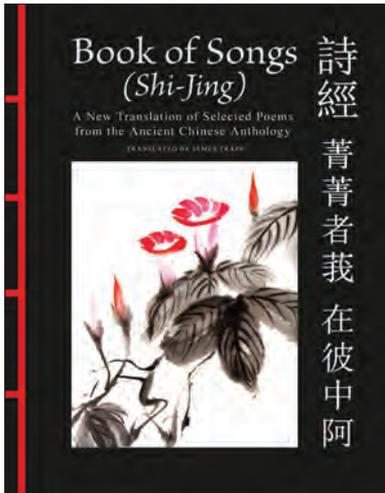

'Tea began as a medicine and grew into a beverage,' are the opening words of Okakura Kakuzō's *The Book of Tea*, written in English in 1906 for a Western audience. The book is a long essay celebrating the secular art of the Japanese tea ceremony and linking its importance with Zen Buddhism and Taoism. It is both about cultural life, aesthetics and philosophy, emphasising how Teatism – a term Kakuzō coined – taught the Japanese many things; most importantly, simplicity, which can be seen in Japanese art and architecture.

Book of Songs CONFUCIUS

Claimed by some to have been compiled by Confucius in the 5th century BCE, the *Book of Songs* is an ancient anthology of Chinese poetry. Collecting poems over a number of centuries, the anthology – sometimes known as the Classic of Poetry (or *Shi-jing*) – is the oldest existing collection of Chinese poetry, comprising 305 works dating from the 11th to 7th centuries BCE. Some poems are shorter folk songs which record the voice of the common people, on love and courtship, political satire and protest. Others are about court life and dynasties.

Bushido INAZO NITobe

“Chivalry is a flower no less indigenous to the soil of Japan than cherry blossom” are the opening words of Inazo Nitobe’s *Bushido*. It was 1900 and Inazo, a Japanese academic living in the USA, had been prompted to write the book after an American professor had wondered how the Japanese imparted moral education on their children without any religious instruction. The answer, Inazo realised, was through Bushido. Bushido is the chivalric code of moral principles that the Samurai followed: rectitude, courage, benevolence, respect, honesty, honour and loyalty.
